

Biggest Savings Yet: Liquid Ingress Damages Dental Equipment

Key Facts

- ✓ Insured reported water damage to dental equipment
- ✓ CATS inspected and identified that much of the equipment is likely to fail over time
- ✓ The CATS team's expertise resulted in total savings of £56,000 for the insurers

The Claim

The insured reported water damage affecting dental equipment on their premises. CATS engineers conducted an independent inspection and confirmed that while the first floor equipment was working, the nature of the water exposure meant the units were prone to failure overtime. It therefore would have been unwise to rely upon this technology in a clinical setting.

The Resolution

A quotation was put forward for the nearest current equivalent items. By involving CATS on this claim, the insurers saved 42% on the total amount claiming, equal to £56,000 in savings.
