

CATS Engineers Save 75% on Elevator Replacement After Impact Damage

Key Facts

- ✓ The insured submitted two quotes for elevator repair work
- ✓ CATS engineers independently inspected and recommended a more accurate repair at less cost than the incumbent suppliers
- ✓ Our recommendation saved the insurer £18,550

CATS can assess, inspect, repair or replace lifts and escalators.

The Claim

The insured reported impact damage to their elevator submitting two quotes for the repair work required. The best quote the insured had obtained was £24,900. CATS engineers were asked to inspect the site independently, during which it was identified that a brand new PCB and control system would be required. However, a full refit of the shaft and replacement of other equipment would not be required.

The Resolution

The two areas identified by the engineer as needing replacing were replaced as part of the repair. The total liability of this claim was £6,350 and the saving achieved was £18,550.
