

£12,000 Save on Tonometer and Fundus Camera

Key Facts

- ✓ The insured suffered liquid damage to their Tonometer & Fundus Camera
- ✓ CATS engineers inspected and confirmed the units to be BER.
- ✓ CATS expertise and knowledge saved the insurers £12,000

Not only do CATS assist with optical equipment but also technology claims related to healthcare, dentistry and veterinary equipment.

The Claim

The insured suffered liquid ingress to their Topcon Auto Tonometer and Nidek Fundus Camera resulting in both units failing. After CATS accredited engineers inspected the units, it was agreed that the units had suffered liquid damage which was consistent with the claim. Unfortunately, both units were BER due to the age, damage and unavailability of parts.

The Resolution

CATS advised cash settlement on both equipment based on the current price for like for like replacements. The team were able to save the insurers 37% equal to a £12,000 saving.
